CiA conformance testing order form

1 Brief information about CiA conformance testing

1.1 Scope of services

The CiA conformance testing is a testing service offered at CAN in Automation that guarantees that the tested device is conform to the CANopen FD application layer and communication profile (CiA 1301). Detailed information about CiA conformance testing is provided on CiA website.

The test procedure itself is divided into the following parts:

- Test of the provided XML-based electronic device description (XDD) according to its conformance to CiA 1311-1
- Test of the provided device according to its conformance to CiA 1301 and according to the provided XDD.

1.2 Fees for device certification

<table>
<thead>
<tr>
<th>Service</th>
<th>Fee non-CiA members</th>
<th>Fee CiA members</th>
</tr>
</thead>
<tbody>
<tr>
<td>Basic rate per device test session</td>
<td>1000,- € (1190,- € incl. German VAT)</td>
<td>750,- € (892,50,- € incl. German VAT)</td>
</tr>
<tr>
<td>(certificate included)</td>
<td></td>
<td></td>
</tr>
<tr>
<td>Basic rate per family test session (3 device</td>
<td>2000,- € (2380,- € incl. German VAT)</td>
<td>1500,- € (1785,- € incl. German VAT)</td>
</tr>
<tr>
<td>test sessions and certificate included)</td>
<td></td>
<td></td>
</tr>
<tr>
<td>Rate per hour*</td>
<td>100,- € (119,- € including German VAT)</td>
<td></td>
</tr>
</tbody>
</table>

* Additional tests and support after completed testing, in which the product failed to comply, will be charged separately.

2 Contact and device information

2.1 Company

Name ........................................................................................................................................
Address .....................................................................................................................................
........................................................................................................................................
........................................................................................................................................

2.2 Contact person

Name ........................................................................................................................................
Phone ................................................................................................................................. E-mail ........................................................................................................................................
2.3 Device information

Name

XDD

Vendor-ID (1018h – 01h)

3 Generic device features

Connector compatibility: Status LED compatibility:

☐ CiA 106  ☐ CiA 303-3

Node-ID assignment (e.g. software-, hardware switch, LSS FD, LMT, Node claiming):

Supported network management (NMT) functionality:

☐ pure NMT server functionality  ☐ NMT server and NMT manager functionality

Number of supported process data objects (PDOs)

…… # Receive PDO  …… # Transmit PDO

Supported additional heartbeat functionality:

…… # Hearbeat consumers

Supported CANopen FD device or application profiles (CiA profile numbers):

4 Order

By submitting this order form, I order the following services, which are offered by CAN in Automation:

☐ CANopen FD device conformance testing

☐ CANopen FD family conformance testing

I agree, that my successfully certified device is published on CiA’s website.

Proposed date for the test session: ______ - ______ - ______

______________________, the ______ / ______ / 20________ (City) (Day Month Year) (Signature)
